**Cocktail hour: 5:30p-6:30p**

**Dinner/Presentation: 6:30p-8:30p**

Florida Chapter Members FREE!!!

Non-Florida Chapter Members & Non-SCC Members - \$45.00

## Starch Chemistry for Personal Care

Sarah Thiewes

Glenn Corp., part of Azelis Americas

### Abstract

More consumers today are seeking more natural sounding INCI names on their Personal Care Products pushing formulators to look at alternatives for tried and true ingredients. While starch is not new to the industry, many formulators are either not familiar with how to work with starches in their formulas, what benefits starch can bring, or both. Starch can be a great natural alternative to some of the synthetic ingredients some consumers and brands are looking to avoid. This presentation is designed to provide a background on starch chemistry and highlight the benefits of native and modified starches in a variety of Personal Care formulations.

### Speaker Bio

Sarah Thiewes is a graduate of The College of New Jersey with a Bachelor of Science in Chemistry. She began her career as a formulation chemist for personal and pet care products at a contract manufacturer in southern NJ in 2002. From there she has worked for two major ingredients suppliers in a variety of roles including Technical Service, Marketing, and Product Management. In 2016 she joined Glenn Corp, part of Azelis Americas as the Technical Development Manager and Tristate CACS.
