Cocktail hour: 5:30p-6:30p

Dinner/Presentation: 6:30p-8:30p

Florida Chapter Members FREE!!!

Non-Florida Chapter Members & Non-SCC Members - \$45.00

An Introduction into Oleosomes and its Applications in Cosmetics

Dr. Kristin Brancato & Mr. John Chase of Botaneco

Abstract

Botaneco focuses on seed technology, specifically isolating oil bodies, or oleosomes which are the storage units of natural oil inside the seed. Oleosomes are comprised of the natural oil, triglyceride core, coated by a phospholipid monolayer and stabilized by unique proteins called oleosin. This unique structure is isolated as it appears in nature through a sustainable process and is used in personal care and food and feed applications. This structure is excellent at preserving the integrity of the natural oil core and lends itself to be an excellent delivery system for personal care products as well.

Speaker Bios

Dr. Kristin Brancato has over 25 years of experience in technical and executive positions in the consumer products space primarily focusing on new product development for home care, personal care, women's health, and the nutraceutical markets. Bringing invaluable knowledge and expertise, she plays a key role in establishing and delivering Botaneco's innovation and technology strategy. Kristin has a Ph.D. in Bioinorganic Chemistry from the University of Notre Dame, a Bachelor of Science in Chemistry from Pennsylvania State University, and is the holder of six patents.

John Chase is Senior Formulations Lab Manager at Botaneco® Inc., an innovative, solutions-focused natural ingredient manufacturer based in Calgary. He is currently located in Botaneco's personal care site in beautiful Lambertville, NJ. Previously, John worked as Innovation and Formulation Lab Manager at Vantage Specialty Chemicals for a number of years. He holds a number of patents utilizing natural emulsifiers in novel ways. His passion for cosmetic chemistry is only surpassed by his love of his family.
